Medi-Inn (UK) Limited

Medi-Inn (UK) Ltd was incorporated in 2014 and is a co-operation with Body Group Deutschland, a manufacturer and distributor of medical and surgical products for the European Health Sector. We are very proud to say that we are a medium sized family business run on ethical principles, whilst still maintaining our independence from third party investment companies.

The Body Group investment strategy of recent years has enabled us to maintain the highest quality standards whilst supplying at highly competitive prices in all of our Markets. Our Corporate Structure allows us to remain flexible and to react very quickly to changing Market Trends and to introduce new product innovations. The close cooperation and control of our own production facilities reduces the risk of quality problems and ensures the continuity of our most precious resource, which is The Body Group Employees worldwide.

The high quality of our medical products and services is ensured by the Medi-Inn Brand quality management system, certified according to EN ISO 13485. We have successfully passed all safety and quality audits and have continuously been re-certified by the key auditing organizations such as MDC and Bureau Veritas recent years.

SUPPLIES FOR
HOSPITALS AND
DOCTORS' SURGERIES

GLOVES & PROTECTIVE CLOTHING

All-round protection from head to toe for meeting various safety requirements

The use of Medi-Inn gloves and protective clothing reduces the health risks and impact of different risk factors on both patients and the people wearing the products. They are effectively protected in a wide variety of different ways and the gloves are the best form of protection for preventing their surroundings from becoming contaminated and infections spreading.

Page 9

EXAMINATION & DIAGNOSTICS

Solutions that help in making a reliable diagnosis

The high-quality selection of tried and tested Medi-Inn instruments in the research & diagnostics section is ideally suited for reliable use in hospitals, doctor's offices and nursing homes. They are the ideal tools for aiding medical specialists when examining patients and determining a diagnosis.

Page 51

WARD & PATIENT SUPPLIES

Everyday medical aids for use with patients

The assortment of products in the ward and patient supplies section primarily includes reusable medical products; they range from medicine dispensers to bedpans. The products help medical and specialised staff on hospital wards with their everyday tasks when taking care of patients and people who need nursing care.

Page 61

PROTECTIVE COVERS & BED PROTECTORS

Safe and hygienic protection for all positions

Medi-Inn high-quality protective covers and bed protection products are designed for various areas of use; they come with various levels of absorbency and are made to be either reused or for single-use. Beds, exam tables, floors and inventory are reliably and safely protected from getting wet and soiled; these products minimise the risk of infection and increase the patient's comfort.

Page 73

NURSING CARE & HYGIENE

Optimum hygiene & safety for patients and staff

The nursing care & hygiene section offers customers a wide selection of Medi-Inn solutions, which satisfy the increasing requirements for providing day-to-day care to patients as well as maintain hygiene in hospitals and at home. These products are reliable aids for medical specialists and nursing staff who are safely treating patients and people who are bedridden.

Page 85

CLEANING & DISINFECTION

Hygienic cleaning and disinfection of surfaces and skin

The product range consists of ready-to-use solutions and other Medi-Inn medical products for hygienically cleaning and disinfecting surfaces and skin. Germs are effectively reduced and the risk of infection is lowered, which protects medical specialists and nursing staff as well as patients and their surroundings.

Page 95

FIRST AID

Quick first aid within and outside of the hospital setting

The Medi-Inn and Riegerline medical products for first aid safely and reliably support the healing process for injuries and wounds.

Page 101

DISPENSERS & HOLDER SYSTEMS

Storing and organising medical supplies

High-quality dispenser and holder systems made out of stainless steel and acrylic are optimal solutions for storing medical supplies.

Page 107

The perfect glove for different applications

Our examination and protective gloves fulfil the important task of protecting the hands of the person who is wearing them during different types of use in an optimum way, while offering them a high level of comfort.

The requirements that gloves have to fulfil includes protecting people from mechanical risks, chemicals, heat, cold, moisture, grease and oils. Gloves are comfortable to wear when they fit well, are made out of skin-friendly materials, have a secure and non-slip grip on dry and wet surfaces, and preserve the sense of touch.

Glove materials

We only use high-quality materials for our gloves, which have been meticulously manufactured. You can get more information on the respective glove materials, nitrile, latex vinyl and PE, directly from the product data pages.

Glove sizes

Depending on the model, our gloves come in the sizes XS for very small hands and up to 3XL for very large hands.

Circumference of hand	Size	Order size
17 cm	6	XS
19 cm	7	S
22 cm	8	M
24 cm	9	L
27 cm	10	XL
29 cm	11	XXL
31 cm	12	3XL

The right size can be determined easily and quickly by measuring the circumference of your hands. Measure your hands with flexible measuring tape at the widest area of your hand without including your thumb. If you have any doubt, always order the larger size.

Standards and statutory requirements

Our examination and protective gloves comply with stipulated statutory requirements in the respective application areas. Symbols are used to identify several standards and statutory requirements in order to ensure adequate protection. Here you can find a selection of the most important symbols which we use to label our products.

Detailed information on the protective properties of the gloves for sale have to be indicated on the packaging, and if it has an i-symbol on it, it can be found directly in the instructions for use, inside the packaging.

EN 455

Our non-sterile gloves are certified as a Class 1 medical product according to EN 455 under the Medical Device Directive, (MPD) and they also have the CE marking.

EN 420

Our protective gloves meet the general requirements set out in EN 420. All legally required information can be found on the packaging.

AQL
1.5

The EN 455-1:2000 standard stipulates that single-use medical gloves must have an impermeability level of at least 1.5 AQL (acceptable quality level).

KTP

The EN ISO 374-1:2016 standard regulates the performance requirements for protective gloves while handling dangerous chemicals and micro-organisms.

Gloves labelled with the EN 374-1:2016 standard are assigned to the classes A, B or C, depending on their permeation resistance. There are a total of 18 chemicals that have been tested, which are indicated as a category identification letter under the symbol. Type A is for fully-fledged protective gloves which protect people from at least 6 different chemicals; type B from at least 3 chemicals; and type C from at least 1 chemical.

EN ISO 374-5:2016

Not assessed against viruses

EN ISO 374-5:2016

VIRUS

The EN ISO 374-5 standard addresses risks associated with handling micro-organisms and infectious agents.

Labelling with the DIN EN ISO 374-5 standard gives information on the type of protection that a glove offers against bacteria and fungi. For additional protection against viruses, a bacteriophage penetration test was successfully completed in accordance with ISO16604:2004 (method B) or in accordance with ASTM F1671. The symbol contains an additional VIRUS marking.

PSA KAT I-III

Legislators have prescribed the use of personal protective equipment (PPE) during medical activities conducted in a professional setting. This includes, in particular, any work which involves risks. The gloves we sell were tested according to the PSA guidelines and have been assigned to 3 categories in order to ensure the optimum level of protection for the person wearing them:

PSA Category I – protection from low-level risks

PSA Category II – protection from medium-level risks

PSA Category III – protection from high-level risks

Gloves that feature this symbol are food-safe and fulfil the European regulations for hygienic handling and processing of food.

**Medi-Inn® Nitrile Examination & Protective Gloves**

Multi-faceted protection in different areas

The very skin-friendly and durable Medi-Inn®-**NITRILE** examination gloves offer multi-faceted protection for working in different areas, including handling grease, oils and solvents, due to their special nitrile compound and the high-level risk class that they have been assigned. In addition to fitting very well, the protective gloves made out of nitrile are very elastic, tear resistant and very comfortable to wear.

**Material**

- Gentle to the skin, synthetic nitrile polymer without natural latex
- Very elastic and tear resistant
- Powder-free

Features

- High-level of protection
- Easy to put on
- Very comfortable to wear
- Secure grip
- Usable on both hands
- Rolled cuff

Nitrile

Medi-Inn® Nitril Chemical Resistant Gloves

Especially high and safe protection when working with chemicals

The tear and puncture resistant Medi-Inn® chemical resistant gloves **HIGH RISK BLUE** for single-use have cladding that is twice as thick as the cladding on standard nitrile protective gloves. These chemical resistant gloves are suitable for any challenging work that requires safe handling of chemicals and solvents. The fully micro-roughened surface of the gloves enables the user to have a secure grip, even on wet surfaces.

Medi-Inn® Vinyl Protective Gloves

Hygienic protection for housework, on the job and while travelling

The latex-free Medi-Inn® **VINYL** protective gloves are very skin-friendly, comfortable to wear and resistant to short-term exposure to mineral and cooking oils. The soft consistency and the light material quality lend this glove an excellent sense of touch. The vinyl gloves are free of proteins that cause latex allergies. **VINYL STRETCH** is a special version made out of elastic vinyl.

**Medi-Inn® Nitrile Examination & Protective Gloves**

For universal use while undertaking very challenging tasks under extreme conditions

The heavy duty Nitrile examination gloves in the **CLINIC PERFECT** product series are suitable for completing challenging tasks under extreme conditions because they feature the special nitrile compound and have the highest PSA risk class. In addition to their great fit, the **CLINIC PERFECT** gloves give users a good sense of touch as well as a high level of protection when handling chemicals and solvents due to their high material density.

**Material**

Medi-Inn® Latex Household Gloves

For universal use when cleaning or working with water

The Medi-Inn® **LATEX** household gloves made out of natural rubber are suitable for general cleaning and working with water in the household, for professionals and while handling oils and grease. The anatomical fit and the sweat-absorbing velour lining make these gloves especially comfortable to wear. The pronounced groove profile on the palms enables the user to have a secure grip, even on wet surfaces.

**Grippaz® Nitrile Protective Gloves**

Especially good grip when handling oils, detergents, solvents & water

GRIPPAZ uses a specially-formulated organic nitrile compound which is especially suitable for handling fats, oils, detergents and solvents. The patented scale embossing offers users a one-of-a-kind good grip when completing challenging tasks in a wide range of areas, even in wet conditions.

**Material**

- Special organic nitrile compound without natural latex
- Patented scale embossing
- Food safe
- Powder-free

Features

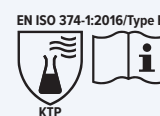

- High-level of protection
- Easy to put on
- Very comfortable to wear
- Very secure grip
- Extra reinforced & tear resistant
- Usable on both hands
- Rolled cuff

Application areas

- Chemical & other industries
- Workshops
- Commercial kitchens
- Nursing

Safety / conformity

Personal protective equipment **Category III** in accordance with Regulation 2016/425

CE 2777 AQL 1.5**GRIPPAZ – ORANGE**

7.5 g / M

Features

- Innovative and patented grip for a very secure grip
- Very robust through the fish scale embossing (interior & exterior)
- Chlorinated
- Orange

Fine Particle Masks

Protection from substances harmful to health and mutagens

Features

- Robust mask body
- Padded, non-woven inner material
- Flexible nose bridge construction
- Fits perfectly on the face
- Easy handling, even with gloves on
- Secure fit through the elastic band
- Individually hygienically packaged in a bag

FINE PARTICLE MASK FFP2 NR D

Features

- FFP2 NR D meets the requirements of DIN EN 149:2001 + A1:2009
- Protection from hazardous solid and liquid dust particles, smoke, and water-based and oil-based aerosols
- The design with the exhalation valve eases the rapid removal of warm and moist exhaled air

PROTECTIVE COVERS &
BED PROTECTORS

PROTECTIVE COVERS & BED PROTECTORS

Medi-Inn high-quality protective covers and bed protection products are designed for various areas of use; they come with various levels of absorbency and are made to be either reused or for single-use. Beds, exam tables, floors and inventory are reliably and safely protected from getting wet and soiled; these products minimise the risk of infection and increase the patient's comfort.
